## **Applied Software To Offer Autodesk's 2011 Software Portfolio for Building Design, Infrastructure and Construction Industries**

*Updates for Key Product Lines Promote Building Information Modeling and  
Multidisciplinary Collaboration for New and Renovation Projects*

**ATLANTA (March 25, 2010)** – [APPLIED SOFTWARE](#) today announced it will offer the 2011 software portfolio for building design, infrastructure and construction industries from Autodesk, Inc., a world leader in 2D and [3D design](#), engineering and entertainment software. The 2011 portfolio includes Autodesk Revit Architecture 2011, Autodesk Revit Structure 2011, Autodesk Revit MEP 2011, AutoCAD Revit Architecture Suite, AutoCAD Revit MEP Suite, AutoCAD Revit Structure Suite, AutoCAD Architecture 2011, AutoCAD MEP 2011, Autodesk Navisworks 2011, Autodesk Buzzsaw 2011, Autodesk 3ds Max Design 2011, AutoCAD Civil 3D 2011, and AutoCAD Map 3D 2011 software.

Autodesk's 2011 software portfolio is designed to help increase industry adoption of the [Building Information Modeling](#) (BIM) process, facilitate multidisciplinary collaboration and address new and renovation projects.

"The building design, construction and infrastructure industries must improve productivity, while at the same time completing complex projects on time and at, or under budget," said Jay Bhatt, senior vice president of AEC Industry Solutions. "Our new 2011 software helps support that goal by capitalizing on the enormous benefits of Building Information Modeling, and facilitating multidisciplinary collaboration from start to finish for everything from new construction and renovations on residential and business projects to large-scale infrastructure and government projects."

"We are pleased to be offering the complete Autodesk product line which helps architects, engineers, construction firms and building owners achieve design and operational excellence. Applied Software has been an Autodesk partner for more than 27 years and is proud of our Gold Authorization in architecture, engineering and construction," stated Richard Burroughs, Applied Software president. "We look forward to assisting both our new and our long standing clients in implementing the latest Autodesk technology."

## 2011 Portfolio for Building Design and Construction

Autodesk's 2011 software for new construction and existing building projects supports the Building Information Modeling process to help architects, designers and engineers more easily create and profit from digital design data and better communication across extended project teams. Updated software includes:

- [Autodesk Revit Architecture 2011 software](#) — Autodesk Revit Architecture helps architects and designers work naturally, design freely, and deliver projects efficiently. Purpose-built for building information modeling (BIM), Revit Architecture helps explore design concepts and forms, and better maintain design data through documentation and construction. With parametric change technology, any change made is automatically updated throughout your model, keeping design and documentation coordinated and more reliable. Key new features include:
  - Large team workflow
  - Enhanced visualization
  - Enhanced documentation
- [Autodesk Revit Structure 2011 software](#) — Autodesk Revit Structure is the purpose-built building information modeling (BIM) solution for structural engineering firms, providing tools for structural design and analysis. Revit Structure integrates a multimaterial physical model and an independently editable analytical model for more efficient structural analysis while providing bidirectional links to popular structural analysis software. Key new features include:
  - Framing enhancements (slanted columns, beam systems, trusses and connection symbols)
  - Reinforcement and concrete cleanup enhancements
  - Analytical model enhancements
- [Autodesk Revit MEP 2011 software](#) — Autodesk Revit MEP building information modeling (BIM) software helps mechanical, electrical, and plumbing (MEP) engineers, designers, and drafters gain the competitive advantage of BIM by analyzing and optimizing building systems designs before they are built. Autodesk Revit MEP helps design teams accelerate better design with tools that promote productivity and support sustainable design and analysis. Key new features include:
  - Cable tray and conduit modeling
  - Panel schedules and demand factors
  - MEP fixture management

To help facilitate the BIM process, while at the same time protecting investment in legacy software, training and design data investments, the 2011 portfolio includes:

- [AutoCAD Revit Architecture Suite](#) — Combines [AutoCAD 2011](#) software, AutoCAD Architecture 2011, and Autodesk Revit Architecture 2011 software
- [AutoCAD Revit MEP Suite](#) — Combines AutoCAD MEP 2011 and Autodesk Revit MEP 2011 software applications
- [AutoCAD Revit Structure Suite](#) — Combines AutoCAD 2011, Autodesk Revit Structure 2011 and AutoCAD Structural Detailing 2011 software applications

Enhancements for AutoCAD Architecture 2011 and AutoCAD MEP 2011 include:

- [AutoCAD Architecture 2011](#) □ efficient drafting and documentation with an intuitive environment and purpose-built tools for architects. Key new features include:
  - New geometric and dimensional constraints
  - New renovation tools to help accelerate design and production
  - Improved wall cleanups with new intelligent Cleanup command
- [AutoCAD MEP 2011](#) □ version of AutoCAD software for mechanical, electrical and plumbing (MEP) designers and drafters that provides greater drafting productivity. Key new features include:
  - MvPart view blocks (create and store AutoCAD block names, edit display)
  - Parallel conduit routing
  - Sloped piping

To facilitate multi-discipline collaboration the 2011 building and construction software portfolio includes:

- [Autodesk Navisworks 2011](#) — software (including Autodesk Navisworks Manage 2011, Autodesk Navisworks Simulate 2011 and Autodesk Navisworks Freedom 2011 software) enables design and construction professionals to unite project contributions into a synchronized model for whole-project review, simulation and analysis. Key enhancements for the Navisworks 2011 family of software include:
  - Restructured and simplified User Interface
  - Enhanced sectioning Tools
  - New Primavera link and Gantt view
- [Autodesk Buzzsaw 2011](#) — Autodesk Buzzsaw is a leading software as a service (SaaS) delivered document, data, and design management solution for centralizing and more securely exchanging project information for distributed teams (across stakeholders, geographies and companies). Fully integrated into the portfolio of Autodesk design solutions, Autodesk Buzzsaw 2011 now includes the Buzzsaw Sync feature. With Buzzsaw Sync users can:
  - Automatically synchronize files from the desktop to the Buzzsaw cloud without interrupting users' workflow
  - Easily centralize multi-discipline models for importing into Autodesk Navisworks
  - Leverage Buzzsaw permissions to more securely synchronize, share and access information

To facilitate design visualization and creative storytelling the 2011 portfolio includes:

- [Autodesk 3ds Max Design 2011](#) — Autodesk 3ds Max Design 2011 software offers compelling new techniques for bringing designs to life by aggregating data, iterating ideas, and presenting the results. Key new features include:
  - Quicksilver, an innovative new hardware renderer
  - FBX File Link with Revit Architecture
  - Viewport display of 3ds Max Design materials

### 2011 Portfolio for Infrastructure

Autodesk's 2011 software for road, highway and utilities projects includes:

- [AutoCAD Civil 3D 2011](#) — AutoCAD Civil 3D software, the building information modeling (BIM) solution for civil engineering, helps teams deliver higher-quality transportation, land development, and environmental projects faster. Its model-based approach helps keep project information coordinated while delivering higher-quality documentation and visualizations. AutoCAD Civil 3D helps users gain the competitive advantage of BIM to deliver more innovative project solutions. Key new features include:
  - Scalability and performance improvements, as well as an optimized 64-bit version of Civil 3D
  - Tools to better manage the creation and editing of corridors

- Enhanced superelevation functionality that provides a dynamic link to the alignment and flexible editing options
- [AutoCAD Map 3D 2011](#) — AutoCAD Map 3D software can provide direct access to data needed for infrastructure planning, design, and management activities. AutoCAD Map 3D helps professionals working on transportation, land development, water, and power projects to more easily create, manage, and analyze design, GIS, and asset data so they can achieve better designs, enhanced productivity, and better data quality. Key new features include:
  - New point cloud tools
  - New and enhanced data support
  - Enhanced workflow capabilities

### **About APPLIED SOFTWARE**

Headquartered in Atlanta, Applied Software is one of the largest Autodesk resellers in the region. The company provides consulting, implementation, customization and training services, as well as mentoring and project management to architects, engineers and facility managers in the commercial, government and educational sectors of the architecture, engineering and construction (AEC) industry. Applied Software recently was selected by the General Services Administration to receive a BIM Services IDIQ Contract, providing a variety of BIM Services to a number of GSA Regions. A leader in Building Information Modeling (BIM), Applied Software is recognized as an Autodesk Gold Reseller in Architecture Engineering and Construction. In 2009, Applied Software's Revit instructors received the Autodesk Authorized Training Center North America award for distinguished performance in Autodesk Revit Architecture. Applied Software is also an Authorized Autodesk Training Center (ATC) employing a team of architects, engineers and designers with real-world experience to assist and educate its customers in the use of Autodesk solutions. More information about Applied Software is located at [www.asti.com](http://www.asti.com) or call 1-800-899-2784.
